Professional Summary

Hands-on Power Platform LCNC Developer with 7+ years of experience designing, supporting, and enhancing enterprise Canvas and Model-driven applications. Strong expertise in Power Apps, Power Automate, Power BI, SQL, and Azure integrations, with proven experience supporting production systems, managing deployments, and collaborating closely with business stakeholders.

Experienced in application support, enhancement delivery, documentation, testing, and environment management within regulated and security-conscious environments.

Core Competencies

- Power Platform Development – Canvas Apps, Model-Driven Apps, Power Automate Flows, Power BI Dashboards, Dataverse Schema Design
- Integration & Automation – Microsoft 365, Dynamics 365, SharePoint, Teams, Azure Functions, REST API & Connector Integration
- Data & Analytics – Power Query, SQL, Azure Synapse, Dataflows, Performance Optimization, KPI & Dashboard Design
- Solution Governance – Environment Strategy, DLP Policies, Role-Based Security
- Project Delivery & Collaboration – Requirements Gathering, Agile/Scrum Delivery, Documentation, Stakeholder Communication, User Training

Work Experience

Senior Microsoft Power Platform Engineer
REDEX, Singapore

Jan 2024 – Present

- Provided ongoing support and enhancement for multiple production Canvas and Model-driven Power Apps, ensuring system stability and usability.
- Designed and enhanced Canvas Apps for business users, optimizing performance and usability.
- Built and maintained complex Power Automate flows, including approvals, notifications, data synchronization, and exception handling.
- Created and managed Custom Connectors to integrate Power Platform with REST APIs and backend services.
- Integrated Power Apps with Azure SQL and Azure Blob Storage for document and data management use cases
- Developed Power BI reports and dashboards to consolidate data from Dataverse, SQL, and other business systems.
- Performed application testing, debugging, and issue resolution to ensure reliability and security.
- Managed solution deployments across development, testing, and production environments
- Maintained technical documentation, solution designs, and user guides for ongoing support and handover.
- Collaborated with solutioning and business teams to translate requirements into functional prototypes (MVPs) and iterate based on feedback.

Microsoft 365 Consultant**Jan 2023 – Dec 2023**

YTL Powerseraya, Singapore

- Developed and supported Canvas Apps and Power Automate workflows for internal business users.
- Designed Power Platform solutions integrating SharePoint, OneDrive, and SQL data sources.
- Built Power BI dashboards to provide operational and management insights.
- Supported application deployments and enhancements across environments.
- Conducted user training and documentation to support adoption and self-service usage.

Office Automation Team Leader**Feb 2022 – Dec 2022**

Hana Microfinance, Myanmar

- Developed and supported Power Apps and Power Automate solutions for daily operational workflows.
- Integrated Power Platform applications with SQL databases and core systems
- Managed testing, UAT, and production rollout
- Provided post-deployment support and enhancements based on user feedback.
- Authored solution documentation and user manuals

MIS Manager**Jul 2020 – Feb 2022**

Hana Microfinance, Myanmar

- Managed core-banking operations, SQL/VBA reporting, and portfolio dashboards across 50 + branches.
- Led digitization and data-quality projects, improving efficiency by 70 % and analytics accuracy.
- Mentored 70+ digital officers, strengthening organization-wide digital literacy.

Senior Business Analyst**Feb 2020 – Jul 2020**

Hana Microfinance, Myanmar

- Led digitization projects during the pandemic, including business continuity and employee tracking dashboards by utilizing Metabase and Zoho Creator resulting 70% cut of manual work.

Deputy IT Manager | Strategic Executive**Jan 2018 – Jan 2020**

INNO Capital Microfinance, Myanmar

- Directed core-banking implementation and data migration, established IT policies & SOPs.
- Managed IT budgeting and infrastructure upgrades, supporting business expansion.

Junior System Engineer**Dec 2015 – Jun 2017**

NTT Data Myanmar, Myanmar

- Assisted in Java application development and technical training delivery within the R&D team.

Education

B.Sc. (Hons) Business Information Technology**Feb 2019**

University of Greenwich, UK

First Class Honors
